OBJECTIVE

I am an Self-motivated, Optimistic and hardworking fresher seeking for an opportunity to work in a challenging environment to prove my skills and utilize my knowledge and intelligence in the growth of the organization. I am able to work well both in a team environment as well as using own initiative. I am outgoing and tactful, and able to listen effectively when solving problems.

EDUCATION

Institution	Class Name	Year of Passing	CGPA
Rajiv Gandhi University of Knowledge Technologies, IIIT Srikakulam	B.Tech in Computer Science Engineering Final Year	2025	8.0
Rajiv Gandhi University of Knowledge Technologies, IIIT Srikakulam	PUC (Pre-University Course) M.PC	2021	7.6

SKILLSET

- Technical Skills:** HTML, CSS, JavaScript, Reactjs, Bootstrap, Java, Machine learning, Data analysis.
- Soft Skills:** Good Communication, Quick learning of new things, Problem Solving, Hard Worker, Research Development.
- Developer Tools:** Visual Studio, Github, Eclipse, Jupyter Notebook.
- Design tool:** Figma, Canva.

EXPERIENCE

Internpe Company

May 2024-June 2024

AI/ML Programming Intern

- Developed machine learning models for predictive analysis using Scikit-learn, including classification and regression tasks with algorithms like Random Forest and Logistic Regression.
- Data preprocessing and feature engineering was performed to improve model performance, ensuring clean data for optimal results.
- Evaluated and fine-tuned models to improve accuracy and efficiency, collaborating with the team to implement scalable solutions.

Academor Company

August 2023-September 2023

Web Development Intern

- Developed responsive web pages using HTML, CSS, JavaScript, and React.js, ensuring a seamless experience across devices (mobile, tablet, desktop).
- Implemented Tailwind CSS to streamline the UI development, creating a clean and maintainable design system.
- Integrated dynamic content using REST APIs, improving user experience by allowing real-time data updates, while fixing bugs and contributing to UI/UX improvements based on user feedback.

PROJECTS

Real-Time Image Generation Web App

- Built with ReactJS, HTML, CSS, JavaScript, and TailwindCSS. Integrated machine learning APIs for generating images based on user input.
- Ensured efficient API calls for fast performance. Delivered real-time visual feedback with engaging animations.

Weather Forecasting Website

- Developed using HTML, CSS, JavaScript, and Bootstrap for structure and responsiveness. Integrated OpenWeatherMap API to fetch live weather data.
- Displayed real-time temperature, humidity, and wind speed. Designed a user-friendly and accessible interface.

E-commerce Platform

- Designed a responsive and modern UI using HTML, CSS, JavaScript, and TailwindCSS, Reactjs to ensure a smooth shopping experience on all devices.
- Implemented dynamic navigation and optimized product display with JavaScript and TailwindCSS enhancing user engagement and improving visual appeal for better conversions.

CERTIFICATIONS

- OOPS in Java Course in Simplilearn.
- AI-Machine learning course in Prepinsta.
- AI for Everyone: Master the Basics Course in EDX
- Machine Learning with Python: A Practical Introduction in EDX
